

CyberGuard AI: Autonomous Incident Audit Forensic Log Card

Security Architecture Metric Element	Observed Runtime SIEM Value Log
Network Transport Application Protocol	SSH
Origin Network Zone Ingress Point	External-IP
Host OS System Patch Baseline Compliance Year	2018
Concurrent Open Sockets Active Threads Count	3,500
Connection Request Flow Rate Velocity	780 connections/sec
Exfiltration Data Packet Target Size	15400 KB
Failed Account Authentication Violations	12
Target Host CPU Compute Overhead Load	94%

Intelligent Security Agent Diagnostic Metrics Summary

Integrated Threat Severity Quantization Score: 100/100
Assigned Anomaly Bracket Target Classification: Level 2: Critical Vector Threat Compromise (Autonomous Defense Active)

Active Trigger Hardening Countermeasures Automated Execution Flow

ACTIVE RESPONSE PLAYBOOK EXECUTED: Ingress origin address space null-routed. Isolated host onto secure, air-gapped Quarantine VLAN fabrics. Initializing memory core dumps.
